Reference Letter for Angela Piazza

To Whom It May Concern

It is my pleasure to write this letter of recommendation for Angela Piazza. As Founder & General Manager at NiEW, I have had the opportunity to work with Angela since she joined the company in April 2024, and I have directly overseen her professional development throughout this period.

From the very beginning, Angela stood out for the way she approaches her work. She combines strong UX and UI skills with a genuine ability to understand business problems, not just design tasks. She is meticulous in her research, precise in her execution, and consistently delivers ahead of schedule, often reducing the workload on the people around her in the process. She has conducted field research in China with a manufacturer's largest customers, rebuilt a fragmented design system into a scalable foundation, and designed AI-powered automations that are now in daily use by the team.

This range, from user research to systems thinking to hands-on UI delivery, showed very early, along with a combination of reliability and proactivity. This is what led to her promotion to UX/UI Design Lead in a relatively short time. Today, Angela mentors junior designers, sets design-system standards across projects, and serves as the primary point of contact for important engagements. She absorbs feedback quickly, handles pressure with composure, and builds the kind of relationships with stakeholders that make collaboration genuinely productive.

It is with confidence that I recommend Angela. I believe she can bring a significant contribution to any design team, and I am available to provide further details about her professional background.

Sincerely,

Daniele De Cia
President & Founder
NiEW
